RE: Life and Medical Insurance as Basic Safety Net that Values All HKBNeers Equally

Dear All Fellow HKBNeers,

This is a proud moment in moving towards all HKBNeers enjoying “premium economy” insurance rather than flying different “business” and “economy” classes according to seniority. At HKBNeer, we believe there are certain employment aspects that should be a basic safety net, in which case, every HKBNeer is valued equally irrespective of seniority, i.e., basic elements such as life insurance and medical coverage.

In other companies, it is normal practice for more senior executives to enjoy “business class” life insurance and medical coverage, but at HKBNeer, we consider these a basic safety net and that all HKBNeers are equal. Of course, we have leveraged our company buying power to ensure those who wish to pay for premium insurance coverage can enjoy our economies-of-scale discounted rates.

We consider this as another step forward in leading to “Make our Hong Kong a better place to live”, and hope to inspire other companies to follow.
